

# Mentoring Connections

is designed to fit your busy schedule. You can meet with your mentee at convenient times and locations—in person, through email, phone, or even webcam.

## ***Expand your cross-cultural knowledge***

Discover new ideas and practices, and better understand your clients and coworkers from other countries.

## ***Build your leadership skills***

Mentoring is an excellent opportunity to further develop your leadership and inspirational skills.

## ***Revitalize your own career***

Being a mentor can give you a unique and fresh perspective on your industry and rekindle passion for your work.

## **What does a mentor do?**

As a mentor, you might answer questions about things like

- Industry-specific Canadian workplace culture and communication styles
- opportunities for professional development
- job search strategies and networking techniques

Don't worry! You don't have to be an expert. By simply sharing what you know about your field, you can be a huge help to someone who is just starting out in Canada.

## **Who are you?**

- You are a professional with at least 2 years of local experience in your field
- You value diversity and want to learn more about other cultures
- You are a successful person who is always looking for ways to teach, learn, and grow.
